

Fluted Decorative Wall Panel

To decorate

What if you could decorate a wall with your desired finishing, that reflects good taste and levels of confidence, and best of all, with fuss-free installation?

Create uniqueness

A feature wall ornamented with fluting — those three-dimensional, vertical channels that create an elegant interplay of light and shadow, made its way inside as high-style detailing on decorative paneling. The Fluted Wall is low maintenance, eco friendly, and durable with water-resistance and mold and termite protection. The ability to elevate confidence in space has made it highly favorable for residential and commercial decorations.

The uniquely versatile design of fluted panels ensures that they can be installed to best suit your project. In practice, this means you can specify the placement, curvature, and angle of installation that precisely matches your needs.

Wall decorative lines

Fluted Panels

Fluted Panels are made of an Eco-friendly composite material, which is laminated by a wood-plastic composite material with a hot melt adhesive film completed with a surface.

This is a new composite material with appearance and texture of natural wood with enhanced properties to reduce the need for maintenance.
